Yinbo Wang

School of Statistics, Renmin University of China

audiofool@ruc.edu.cn blog.audiofool.ai

Audiofool934 Audiofool934

Education

Renmin University of China 2023–Present

Bachelor of Science in Statistics

Statistics and Data Science Honors Program

GPA: 3.71/4.0 | Weighted average: 88.24/100

Expected graduation: June 2027

Research Interests

Multimodal understanding and generation; AI agents; creative AI.

Publications and Manuscripts

Meric: A Unified Framework for Multimodal Music Generation and Retrieval via Representation Space Anchoring

Xihua Wang*, **Yinbo Wang***, Jingchao Zhang*, and Ruihua Song

Accepted to *ECCV 2026*. *Equal contribution. [Paper] [Project]

SyncDPO: Enhancing Temporal Synchronization in Video-Audio Joint Generation via Preference Learning

Xin Cheng, Xihua Wang, Ying Ba, Yuyue Wang, Kaisi Guan, **Yinbo Wang**, Wenpu Li, and Ruihua Song

Preprint, 2026. [Paper] [Project]

Research Experience

Research Assistant, AIMind Jul 2025–Present

Renmin University of China | Advisor: Prof. Ruihua Song

- Led **Meric**'s model architecture design, training, and cross-modal data processing.
- Developed a framework that models one-to-many cross-modal associations in a shared music semantic space, unifying generation and retrieval while training acoustic synthesis on unpaired music.
- Demonstrated high-quality multimodal music generation with strong audio fidelity and semantic alignment across text and visual inputs.
- Responsible for the data pipeline for **SyncDPO**'s video-audio joint generation research.

Selected Projects

Moondog: A Taste-Centered Music Agent

An agent harness centered on the listener's evolving musical taste and intent, combining conversational reasoning, persistent preference memory, and tool calling for personalized music discovery, playback, and playlist creation. [Code]

Sway: Real-Time Motion-to-Music Generation

Developed an interactive motion-to-music prototype that maps live hand movement to note and style conditions for a music generation model, enabling stateful neural-audio streaming on Apple Silicon. [Code]

CC-Copilot: Bridging Agent Output and Human Understanding

Addresses the gap between rapid LLM output and human cognitive bandwidth. Combines cross-session monitoring, context summarization, and conversational inspection to help users understand, track, and evaluate long-running coding agents. [Code]

Latent: Exploring Photography Through Semantic Representations

Explores how semantic relationships between photographs can support discovery and visual storytelling. Combines multimodal embeddings with a native macOS workspace for searching, selecting, and sequencing images. [Code]

Academic Activities

X-AGI Conference 2025; 2026

Organizer (2026 edition upcoming).
Contributed to conference content planning, publicity, and visual design.

Selected Coursework

Mathematics: Mathematical Analysis (I–III), Advanced Algebra (I–II), Real Analysis, Measure Theory, and Optimization

Statistics: Probability Theory, Mathematical Statistics, Regression Analysis, Stochastic Processes, Nonparametric Statistics, and Statistical Computing

CS and Machine Learning: Data Structures and Algorithms, Parallel Computing, Machine Learning, Deep Learning, Reinforcement Learning, Probabilistic Graphical Models, and Digital Signal Processing

Honors and Languages

Honors: Excellence in Study Scholarship, Third Class (2024); Beijing Merit Student (San Hao)

English: TOEFL iBT: 5.0/6.0 (100/120 comparable; CEFR C1); February 7, 2026
